Protect your home from water damage

Eavestroughing

Marathon's eavestroughing safeguards against water damage, siding stains, ruined sun decks, washed-out flower beds, and pitted concrete by directing water away from buildings and gardens. Featuring 5" residential continuous gutters (optional embossing) and 6" commercial continuous gutters, along with aluminum fascia cover and a durable baked-on enamel finish, our eavestroughing eliminates the need for painting and unsightly rust stains. With a wide range of available colors, protect your property with style and durability.

Leaf/Snow Guards

Keep your gutters flowing smoothly with Marathon's leaf and snow guards, designed specifically for our northern climate. Our strong, perforated aluminum screens effectively prevent leaves and debris from clogging your gutters, ensuring you spend less time on maintenance and more time enjoying peace of mind. Snow and ice pose threats to gutter systems, particularly

for metal roofs lacking snow guards. Without these guards, heavy snowfall can cause significant damage, potentially ripping off gutters. Our wrap-around hangers effectively mitigate snow load on metal roofs.
